

SHRIMP PROTEIN MEAL FOR AQUACULTURE

SHRIMP PROTEIN MEAL is produced from fresh shrimp shell, a by-product for production of shrimp for human consumption. It is steam cooked, heat dried in drum dryer and finally pulverized into fine powder. The nutritional and flavor profile combined with high protein content make it an attractant and with excellent palatability.

INDREGIENTS: Shrimp Shell

SPECIFICATION:

Crude Protein	48% Min., up to 55%
Crude Fat	1% Min., up to 4%
Crude Ash	30 % Max., average 25%
Moisture	10 % Max., average 8%
