

FEATURES AND BENEFITS

Feature	Benefits
All Natural Technology	<ul style="list-style-type: none"> ➤ Naturally derived phytogetic technology that is environmentally safe ➤ Non-toxic to humans and animals ➤ Safe and easy to handle by soilless media producers, soil manufacturers, and high-end compost producers
Natural Surfactant Properties	<ul style="list-style-type: none"> ➤ Assist in water absorption and retention ➤ Reduce irrigation frequency
Natural Phytogetic Compounds	<ul style="list-style-type: none"> ➤ Invigorate the beneficial soil microbes that improve root growth and soil structure ➤ Boost microbial activity of the growing media to improve plant performance
Compatibility	<ul style="list-style-type: none"> ➤ Safe for use with other commercially available fertilizer sources ➤ Mixes easily and uniformly with all substrates ➤ Zero plant phytotoxicity
Physical Characteristics	<ul style="list-style-type: none"> ➤ Uniform particle size ➤ Won't clump
Industry Acceptance	<ul style="list-style-type: none"> ➤ Recognized by professionals as an essential tool for maximum plant growth and health ➤ Proven effective in real world performance application

Available in 45 lb bags or in (2) 750 lb totes on a pallet

30 – 50 coarse mesh

27% TDS (Total Dissolved Solids)

36,300 ppm sapogenins

31 lb/cubic foot bulk density
